

Production Module

Real-time Interactive Schedule View

Meeting customer demands and government regulations requires knowledge and control over the real-time operation of your production. Production module shows you how products flow through your plant so you can improve schedule execution accuracy and manage in-process inventory. Genealogy reports and real-time tracking will help to make your plant operations more responsive so you can keep closer tabs between your orders and production output.

Benefits

- Improve operational efficiency by gaining knowledge and control over real-time production operations
- Generate more revenue by meeting customer demands and government regulations through product genealogy reports
